

### Improving Access to Quality Medical Care

The practice and delivery of healthcare is changing, with an emphasis on improving quality, safety, efficiency, & access to care. Indemand Interpreting, the Arizona Telemedicine Program & the Southwest Telehealth Resource Center invite you to a free webinar on the implementation and practice of telemedicine.

## Webinar

# Wednesday, December 6, 2017 ~ 12:00pm MST

(11pm PST; 12pm MST; 1pm CST; 2pm EST)

## "Video Interpreting for Telehealth....How to service Limited English Patients and the deaf population in virtual consultations"

#### Learning Objectives:

- Understand how video interpreting currently in use for onsite Limited English Patients (LEP) and the deaf has evolved to service patients in telehealth
- Gain insight into how your facility with an existing interpreting staff can leverage video interpreting to scale their efforts to new locations
- Learn how to use video interpreting to be a business accelerator for your patient admissions beyond meeting compliance needs

**Brian Douglas**, Vice President of Business Development, at InDemand Interpreting has been involved in the telehealth space for over 12 years, previously with device maker AMD Global Telemedicine, Polycom, and technology integrator Carousel Industries. Brian focuses today on strategic alliances and partnerships at InDemand Interpreting, working with various video conferencing manufacturers, online telemedicine providers, and technology integrators around the country to make telehealth accessible to all populations. Working in partnership with health systems, physician specialty clinics, community health centers, and other emerging places of care, Brian has expertise in creating custom workflows and integrations allowing for improved patient and provider experiences.
